

Preparation Notice

Mt. Helix Pest & Termite Control has been contracted to provide pest control service to the exterior of the property and to the interior of units on an as needed basis. If you desire an interior service please read the following and be prepared for service when the technician arrives. We also ask that you **DO NOT** use over-the-counter pest control products before or after any of the following services. The products we use will not work as well when used with over-the-counter products.

ANTS: It is not necessary to vacate for this service unless you have sensitivities to pesticides. Floor mats and other items will need to be removed from the floor for services. All items in the kitchen and bathroom cabinets need to be removed if Ants are in those areas. These items can be put back into the cabinets 30-40 minutes after the treatment has been completed. Children and pets should be kept away from area being treated and the technician during and immediately following treatment.

COCKROACHES: It is not necessary to vacate for this service unless you have sensitivities to pesticides. Floor mats and other items will need to be removed from the floor for services. All items in the kitchen and bathroom cabinets and drawers need to be removed. These items can be put back into the cabinets 30-40 minutes after the treatment has been completed. Children and pets should be kept away from area being treated and the technician during and immediately following treatment.

FLEAS: All occupants including pets must vacate the unit during the treatment and for a minimum of one hour after the treatment. Carpets should be frequently and thoroughly vacuumed by the occupant before and after the treatment.

SPIDERS: All occupants including pets must vacate the unit during the treatment and at least two hours after treatment. Clutter should be reduced around the home so that the technician is able to treat the unit thoroughly.

One or more of the following products may be applied to your property:

State law requires that you be given the following information: CAUTION—PESTICIDES ARE TOXIC CHEMICALS. Structural Pest Control Companies are regulated by the Structural Pest Control Board, and apply pesticides which are approved for use by California Department of Food and Agriculture and the United States Environmental Protection Agency. Registration is granted when the State finds that based on existing scientific evidence there are no appreciable risk if proper use conditions are followed or that the risks are outweighed by the benefits. The degree of risk depends on the degree of exposure, so exposure should be minimized. If within 24 hours of application you experience symptoms similar to common seasonal illness comparable to the flu like headache, dizziness, nausea, tearing, and coughing, nose and throat irritation or develop shortness of breath, double vision, unusual drowsiness and weakness, or tremors contact your physician or poison control center (see below) and your pest control operator immediately.
